PROFESSIONAL SUMMARY

Senior software engineer with 4+ years delivering web and mobile products for clients across the US, UK, UAE, and Pakistan. Works the full delivery lifecycle: client requirement sessions, decomposing business goals into technical plans, production React, React Native, Next.js, and SvelteKit code, coordinating backend, QA, and design, and owning release engineering through App Store Connect, Google Play Console, and multi-environment configuration. Currently leads a 12-person cross-functional team. Uses AI-assisted engineering to become productive in unfamiliar codebases fast — including shipping production fixes in Flutter and C++ with no prior production experience in either.

CORE COMPETENCIES

Web & Mobile Product Development · Technical Leadership · Cross-Functional Team Coordination · Client Communication & Requirement Gathering · Project Ownership & Delivery Management · Sprint Planning · Code Review · Release Engineering · Mobile App Store Delivery · REST API Integration · State Management Architecture · Performance Optimisation · AI-Assisted Engineering · Workflow Automation

TECHNICAL SKILLS

- Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3
- Frontend:** React (4 yrs), Next.js (2 yrs), SvelteKit (1 yr), Tailwind CSS, ShadCN, NextUI
- Mobile:** React Native (4 yrs), Expo, React Navigation, Gesture Handler, NativeWind
- State & Data:** Redux Toolkit, Redux, REST APIs, Axios, PocketBase
- Backend & Cloud:** Firebase (Auth, Firestore, Cloud Messaging), AWS (integrations, Secrets Manager), FastAPI integration
- Release & DevOps:** App Store Connect, Google Play Console, native iOS/Android configuration, multi-environment setup (dev/staging/prod), Git
- AI & Automation:** n8n, OpenAI API, Claude, OpenAI Codex, custom AI coding agents
- Testing & Tooling:** Cypress, Postman, Figma, VS Code · **Exposure (production fixes, not core stacks):** Flutter / Dart, C++

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Bitrupt

Dover, Delaware, United States (Remote) · December 2024 – Present
Hired as Senior React & React Native Developer; scope now spans technical leadership and delivery ownership.

- Lead delivery for a **12-person cross-functional team** spanning frontend, backend, QA, design, and business analysis — assumed ownership mid-engagement when the Project Manager departed, absorbing planning, task assignment, and client reporting without pausing the delivery schedule.
- Own client relationships directly: run requirement-gathering sessions, feature discussions, and release demonstrations, and convert business goals into prioritised technical tasks for the team.
- Deliver production React Native and Next.js applications across concurrent client products, including a US investment platform (InvestWizz), a compliance-gated corrections communication platform (CallMe), and a fitness application (Fitsono).
- Shipped production defect fixes in a **Flutter** meditation application and a **C++** mobile codebase with no prior production experience in either language, using AI-assisted code analysis to reach working competence in days rather than months.
- Own release engineering end to end: Firebase configuration, native iOS and Android setup, App Store Connect and Google Play Console submissions, and separate development, staging, and production environments verified against the correct backends, with credentials handled through AWS Secrets Manager.
- Standardised Redux Toolkit state architecture and token/refresh-token authentication with protected navigation across mobile projects, removing repeated setup work between engagements.
- Built AI-powered workflow automations in n8n and custom AI coding agents encoding team architecture standards, reducing the review-and-rewrite cost of AI-assisted development.
- Mentor junior developers through structured code review and pairing, and review all team output before it reaches a client.

Technologies: React Native, Expo, TypeScript, Redux Toolkit, React, Next.js, Firebase, AWS Secrets Manager, REST APIs, n8n, Flutter, C++

Senior Frontend Developer — 7G Fuse

Abu Dhabi, United Arab Emirates (Remote) · June 2024 – January 2025

- Led frontend development of a network-integrated portal system, owning the interface architecture and its integration boundary with backend services.
- Delivered a responsive progressive web application in Next.js and TypeScript with consistent behaviour across desktop, tablet, and mobile.
- Built a reusable component layer on Tailwind CSS, ShadCN, and NextUI, eliminating duplicated UI work across portal modules.
- Integrated REST and FastAPI endpoints to replace static placeholder content with live backend data.
- Optimised page delivery and web performance to keep the portal responsive on constrained connections.

Technologies: Next.js, TypeScript, Tailwind CSS, ShadCN, NextUI, REST APIs, FastAPI, PWA

Frontend Developer — Vectracom Pvt Ltd

Karachi, Pakistan · July 2023 – July 2024

- Delivered and secured client approval for **three progressive web applications for Zong, Ufone, and Jazz** — Pakistan's largest mobile network operators.
- Expanded scope from interface work into full-stack SvelteKit delivery, taking ownership of server-side rendering strategy and data access rather than consuming a finished API.
- Integrated PocketBase as the data backend for the Jazz platform, handling data management and retrieval end to end.
- Partnered directly with designers in Figma, editing designs in place to resolve implementation conflicts before they reached development.
- Managed server-side and client-side rendering boundaries deliberately to preserve user data integrity across PWA sessions.

Technologies: SvelteKit, JavaScript, Tailwind CSS, PocketBase, PWA, SSR, React, Figma

Lead Frontend Developer — WordFibre Ltd

Stirling, Scotland, United Kingdom (Remote) · December 2022 – July 2023

- Coordinated cross-disciplinary teams to deliver technical initiatives on schedule and within budget — first role with accountability extending beyond individual contribution.
- Introduced structured Git branching and review workflow, eliminating the merge conflicts and overwritten work that had been slowing the team.
- Built responsive interfaces that held together across viewport sizes, and improved handover quality across the shared development pipeline.

Technologies: React, JavaScript, CSS3, Responsive Design, Git

SELECTED PROJECTS

Confidential Social Platform — *Technical Lead · Feb 2026 – Present.* Web and mobile social/creator platform; lead a 12-person cross-functional team while contributing production code on both surfaces. *React Native, Next.js, TypeScript.*

InvestWizz — *Team Lead & React Native Developer · Sep 2025 – Feb 2026.* US investment platform; owned sprint planning, delivery, and the client relationship alongside hands-on development. *React Native, TypeScript, Redux Toolkit, Firebase.*

CallMe — *Senior Mobile Engineer · Jan 2025 – Apr 2025.* Compliance-gated platform for calling incarcerated family members via government-approved numbers. *React Native, Expo, TypeScript, Firebase.*

Vastu — *Production Support Engineer · Jul 2025 – Sep 2025.* Delivered production bug fixes in a Flutter meditation app with no prior Flutter experience, via AI-assisted code analysis. *Flutter, Dart.*

Walkaround — *Production Support Engineer · Apr 2025 – Jun 2025.* Traced failure paths and shipped surgical fixes in a C++ mobile codebase from a basic starting knowledge. *C++.*

AI Workflow Automation Suite (n8n) — *Automation Engineer & AI Agent Architect · Jun 2025 – Present.* AI customer-service handling with human escalation, voice order intake, and reusable coding agents encoding engineering standards. *n8n, OpenAI API, Claude.*

EDUCATION

BS, Computer Science

DHA Suffa University, Karachi
Oct 2019 – Aug 2023

Higher Secondary / A-Levels

Whales College, Karachi
Aug 2017 – Aug 2019

CERTIFICATIONS

Cloud Solution Architecture (AWS)

Hazza Institute of Technology
Mar 2023 – Sep 2023

Cypress Automation Testing

Jan 2022 – Mar 2022

Web Programming with ReactJS

Jan 2022 – Feb 2022

LANGUAGES

Urdu

Native / bilingual proficiency

English

Full professional proficiency

German

Basic proficiency
